I've tried to use rapture to compile & load a Youtube playlist to a table, but the only problem is that if I put multiple videos in the playlist it only loads the first video. What I really need is for rapture to load all of the videos in the playlist when a button is pressed. I used the sample code in the README and modified it to look for my youtube vid playlist, but it still only loads the first video. Code: `$(document).ready(function () { var rapture = require('rapture'); var rp = new rapture.Player(""); $("#rapture-play").on('click', function () { rp.play(); }); $("#rapture-pause").on('click', function () { rp.pause(); }); $("#rapture-seek").on('click', function () { rp.seek(0); }); $("#rapture-stop").on('click', function () { rp.stop(); }); });` And then here is my html file Play Pause
